

I benefit from listening to XM Satellite Radio and its traffic and weather channels. XM satellite radio provides the variety and quality that are not available where I live and work. I live and work in Gaylord MN and there are no quality radio stations available. I listen to my satellite radio on average 12 hours per day, at work, in my vehicle and at home. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to listen to. I respectfully urge the FCC to reject the NAB's petition 04-160 and I support XM's ability to provide the kind of programming that I demand and deserve.
